MUHAMMAD SALEH JANJUA

Jr. DevSecOps Engineer

+92 3135762088 | MuhammadSalehJanjua@gmail.com | linkedin.com/in/muhammadsalehjanjua

Summary

Final-year Software Engineering student (graduating June 2026) pursuing a Junior DevSecOps role, with hands-on experience designing and securing CI/CD pipelines. Built and maintain a production Jenkins pipeline that automates linting, testing, database migrations, and zero-downtime deployment, with secrets managed through Jenkins credentials binding rather than source control. Comfortable working across the stack – from secure authentication and database schema design to pipeline automation and monitoring – in fast-moving, remote-first teams.

Education

Bachelor of Science (BS) in Computer Software Engineering / *Pak-Austria Fachhochschule: Institute of Applied Sciences & Technology* Oct 2022 – Jun 2026

Subjects: Database Systems, Software Requirement Engineering, Software Design and Architecture, Software Quality Engineering, Full Stack Development, Web Engineering, Software Construction and Development, Software Project Management, Software Testing Tools and Techniques.

Work Experience

Front-end Developer Intern (Remote) / *InzeMarketing* June 2024 – Sept 2024

- **Performance Optimization:** Refactored legacy CSS and JavaScript, improving Google Lighthouse performance scores by 30% and reducing page load times by 1.2 seconds.
- **Responsive Engineering:** Engineered fully responsive interfaces for high-traffic web pages, improving usability across mobile devices.
- **Marketing Integration:** Integrated Google Analytics and optimized SEO metadata to improve organic search visibility for client sites.

Projects

MimaarAssociates Platform – CI/CD Pipeline & Full-Stack Web App [GitHub] June 2025 – Sept 2025

- Designed and implemented an end-to-end Jenkins CI/CD pipeline automating lint, test, database migration, build, and deployment on every push, enforcing consistent quality gates before release.
- Managed environment secrets (database credentials, auth keys) securely via Jenkins credentials binding, eliminating hardcoded secrets from source control.
- Engineered secure authentication workflows with robust validation rules to guard against unauthorized access.
- Automated zero-downtime deployment using `rsync` and PM2 process management, removing manual, error-prone release steps.
- Designed and optimized PostgreSQL schemas with Prisma ORM, and integrated Firebase for real-time data sync, supporting 150+ concurrent users during peak traffic.
- Architected and deployed the full-stack platform using React.js, Next.js, and Node.js, achieving a 20% improvement in platform stability through modular component design.

Cryptojacking Detection Tool using Machine Learning Final Year Project (In Progress)

- Developing a machine learning-based system to detect unauthorized crypto-mining with 90% accuracy in testing, using behavioral analysis of CPU and memory metrics for real-time security monitoring.
- Built a monitoring agent in Python that interfaces with a REST backend to provide real-time threat detection and automated alerts.
- Created a comprehensive visualization dashboard in React.js to monitor system health and security anomalies.

Pixel Art Canvas Web Application

- Built an interactive pixel art tool with adjustable grid sizes (8x8 to 64x64) and a customizable color palette.
- Added real-time drawing and grid visibility toggling through layers.

Agile Capacity Tracker

- Designed a dashboard to visualize team workloads and sprint capacity.
- Integrated with GitHub API for real-time updates on task completion and repository activity.
- Streamlined project management by providing a visual representation of team velocity.

Technical Skills

DevOps & CI/CD: Jenkins (pipelines, credentials binding), Docker, GitHub Actions basics, PM2, rsync, Git/GitHub
Security Practices: Secrets management, secure authentication (NextAuth, Firebase Auth), input validation, environment configuration hygiene
Languages: JavaScript (ES6+), TypeScript, Python, C++, SQL (MySQL, PostgreSQL)
Backend: Node.js, Express.js, Prisma ORM, NextAuth
Frontend: HTML5, CSS3, React.js, Next.js, UI/UX Design (Figma)
Databases & Tools: PostgreSQL, MySQL, Firebase, VS Code, MySQL Workbench, IntelliJ IDEA
Soft Skills: Remote Collaboration, Agile/Scrum, Technical Documentation, Problem-Solving

Certifications

- Microsoft Career Certificate — Career Essentials in Software Development (2024)
- *[REPLACE: IBM DevSecOps badge name]* — IBM (*REPLACE: year*) – *[REPLACE: credential link]*
