Summary

Computer Software Engineering graduate and Software Engineering Intern with hands-on experience designing and building full-stack applications, secure backend systems, REST APIs, relational databases, authentication and authorization workflows, and automated testing pipelines. Experienced with TypeScript, React, Next.js, Node.js, PostgreSQL, Python, .NET, and modern CI/CD practices.

Experience

Software Engineering Intern **June 2026 – Present**

Netlogg

- Designing and developing a company HRMS initiative to centralize employee and HR operations, targeting employee records, self-service, attendance, leave, payroll, documents, reporting, and controlled administrative workflows.
- Building the platform with Next.js, React, TypeScript, PostgreSQL, Prisma, Clerk, Tailwind CSS, and shadcn/ui using a modular full-stack architecture.
- Implemented secure invitation-based identity and account mapping, server-side capability and object-scope authorization, role-controlled employee operations, and protected application boundaries.
- Developed employee directory functionality including employee CRUD workflows, organizational hierarchy, CSV-based employee onboarding, effective offboarding, pagination, filtering, and concurrency-safe updates.
- Implemented security controls for sensitive employee information, keyed CNIC lookup digests, audit trails, request tracing, input allowlists, rate limiting, CSP, CSRF protections, and safe API response contracts.
- Maintaining extensive unit, integration, security, and end-to-end browser testing alongside CI quality gates for linting, type checking, database validation, builds, and application behavior.

Web Engineering Intern **Jun 2025 – Sep 2025**

Mimaar Associates

- Designed and optimized relational schemas in PostgreSQL and wrote SQL queries supporting production application workloads.
- Developed and integrated RESTful APIs across React/Next.js frontends and Node.js backend services, validating data flow and improving application reliability.
- Engineered secure authentication workflows and server-side validation to strengthen protection against unauthorized access.
- Set up and maintained a Jenkins CI/CD pipeline for a Next.js/TypeScript platform, automating build and quality checks previously performed manually.

Front-End Developer Intern **Jun 2024 – Sep 2024**

InzeMarketing

- Developed responsive user interfaces across production web pages using modern HTML, CSS, and JavaScript.
- Identified and resolved performance bottlenecks in legacy CSS and JavaScript through systematic testing and optimization.
- Verified responsive behavior across multiple screen sizes and device configurations.

Projects

HRMS | *Next.js, TypeScript, PostgreSQL, Prisma, Clerk, Tailwind CSS, shadcn/ui*

- Developing a secure, single-organization HRMS for Pakistani businesses, covering employee records, organizational structure, self-service, attendance, leave, payroll, private documents, benefits, reporting, and auditable HR workflows.
- Implemented invitation-based authentication, granular RBAC/capability enforcement, encrypted sensitive employee information, employee lifecycle management, CSV onboarding, org-chart functionality, audit logging, and automated security/integration testing.

- Designed the system around Pakistan-specific operational requirements including PKR, Asia/Karachi time handling, CNIC safeguards, configurable HR policies, and payroll controls, while keeping statutory rules configurable rather than hard-coded.

SentiRev - Code Review Platform (Ongoing) | *Next.js, TypeScript, PostgreSQL, Prisma, Redis, BullMQ, GitHub API*
- Developing a GitHub-native pull-request review service that analyzes changed code for security and logic issues and produces evidence-linked review findings.
- Implemented GitHub OAuth/App integration, repository authorization, signed and idempotent webhook processing, PostgreSQL persistence, and Redis-backed background jobs.
- Designed a review pipeline combining deterministic static analysis with AI-assisted code analysis while retaining developer control over merge decisions and repository data.

LinkPulse | *C#, .NET 10, ASP.NET Core, Blazor Server, SQL Server, Clerk*
- Built a self-hostable URL shortening platform with authenticated link management, public redirects, expiration controls, per-user ownership, and click analytics by device and day.
- Developed separate ASP.NET Core Web API and Blazor Server applications with Entity Framework Core, SQL Server persistence, Clerk authentication, URL validation, analytics aggregation, and automated API/web testing.

Cryptojacking Detection Tool - FYP | *React, Python, FastAPI, Machine Learning, SQLite, pytest*
- Developed a full-stack security monitoring platform consisting of a React dashboard, FastAPI backend, Windows monitoring agent, SQLite database, and machine-learning detection pipeline.
- Built and evaluated a machine-learning model using real and synthetic data to detect cryptojacking-related system behavior.
- Developed automated unit, integration, and API tests with pytest to validate application and detection functionality.

Education

Pak-Austria Fachhochschule: Institute of Applied Sciences & Technology **Oct 2022 – Jun 2026**
Bachelor of Science – Computer Software Engineering
- **Relevant Coursework:** Software Design & Architecture, Database Systems, Software Requirements Engineering, Software Construction & Development, Software Testing Tools & Techniques.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), Python, C#, Java, SQL, C++
Frontend: React, Next.js, Blazor Server, HTML5, CSS3, Tailwind CSS, shadcn/ui, Responsive Design
Backend & APIs: Node.js, Express.js, FastAPI, ASP.NET Core Web API, Spring Boot, REST API Design
Databases & ORM: PostgreSQL, SQL Server, MySQL, SQLite, Prisma, Entity Framework Core
Authentication & Security: Clerk, JWT, RBAC, OAuth, Webhooks, Server-Side Authorization
Testing: Vitest, Playwright, pytest, Jest, React Testing Library, JUnit, Unit/Integration/E2E Testing
DevOps & Tools: Git, GitHub, GitHub Actions, Jenkins CI/CD, Docker, Vercel, PM2, Nginx, VS Code
Additional: Relational Database Design, API Validation, CI/CD Automation, Agile Development

Certifications

IBM Applied DevOps Certificate — Ongoing
Microsoft Career Certificate: Career Essentials in Software Development — 2024
