github.com/Salesmayn-code | portfolio-salesmayn.vercel.app

Summary

Recent Computer Software Engineering graduate with hands-on experience building full-stack web applications and production-style backend systems. Skilled across the modern JavaScript and TypeScript ecosystem, including React, Next.js, and Node.js, with additional experience in relational database design, RESTful API development, and CI/CD automation. Strong analytical mindset with a proven ability to work independently and communicate clearly in English.

Education

Bachelor of Science (BS), Computer Software Engineering Oct 2022 – Jun 2026

Pak-Austria Fachhochschule: Institute of Applied Sciences & Technology

- Relevant coursework: Software Design and Architecture, Database Systems, Software Requirement Engineering, Software Construction and Development, Software Testing Tools and Techniques.

Experience

Web Engineering Intern June 2025 – Sept 2025

MimaarAssociates

- Designed and optimized relational schemas in PostgreSQL, writing and executing SQL queries to support production workloads under peak traffic.
- Developed and consumed RESTful APIs across the React/Next.js frontend and Node.js backend, validating data flow and improving response performance.
- Engineered secure authentication workflows, strengthening protection against unauthorized access through robust validation rules.
- Set up and maintained a Jenkins CI/CD pipeline for the Next.js/TypeScript platform, automating quality checks that had previously been performed manually.

Front-end Developer Intern June 2024 – Sept 2024

InzeMarketing

- Built fully responsive interfaces across high-traffic pages, verifying behavior across devices and screen sizes.
- Identified and resolved performance bottlenecks in legacy CSS and JavaScript, improving page load performance through systematic testing and evaluation.

Projects

Cryptojacking Detection Tool using Machine Learning

- Developed a full-stack system with a React dashboard, a Python/FastAPI backend, and a Windows monitoring agent for real-time cryptojacking detection, backed by a SQLite database.
- Built and validated a machine learning detection model against real and synthetic data to identify cryptojacking behavior with strong accuracy.
- Built an automated test suite using pytest, achieving strong code coverage across unit, integration, and API endpoint testing.

LinkPulse

- Self-hostable URL shortener and analytics dashboard (.NET 10, ASP.NET Core Web API, Blazor Server, Clerk, SQL Server) with click tracking by device/day, link expiry, and per-user ownership controls.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, C++, SQL

Frontend: React, Next.js, HTML5, CSS3, shadcn/ui, responsive design

Backend & APIs: Node.js, Express.js, FastAPI, RESTful API design and validation, NextAuth

Databases: PostgreSQL, MySQL, SQLite, Firebase

DevOps & Tools: Jenkins CI/CD, Docker, Git/GitHub, VS Code, PM2, Nginx

Testing & QA: pytest, unit & integration testing, test coverage analysis, Jest, React Testing Library

Certifications

Microsoft Career Certificate – Career Essentials in Software Development (2024) IBM Applied DevOps Certificate (2026)
